Narrative: Fire flown by 222ME at 1250. Fire is active on west flank running north. South flank has crossed the creek in two locations. East flank active, running north on tundra covered ridges and black spruce on slopes. North edge obscured by smoke but there are a couple of very prominent fingers pushing to the north. A limited recon of west flank at 1807 showed that it was about 7 miles long and still 2-3 miles east of the Kuskokwim. The northern 3 miles of the perimeter are backing down slope in black spruce. The north side of the fire is completely obscured.
